RELEVANT SKILLS

Programming Languages

C#, C++, Java, JavaScript, Python, SQL

Frameworks & Libraries

Express.js, Next.js, Node.js, React.js, PySpark, Spring Boot

Tools & Technologies

Bash, Git, GitHub, Bitbucket, Gradle, AWS, Google Cloud, Heroku, Railway, Visual Studio Code, IntelliJ IDEA, SQL Server Management Studio, DBeaver, DataGrip, Linux

Databases

MongoDB, Oracle, PostgreSQL

RELEVANT EXPERIENCE

Java Developer @ Boston Scientific

September 2022 – Present | Arden Hills, MN

- Proficient in KMS and PKI platforms such as Thales CipherTrust, PrimeKey EJBICA, and DigiCert One.
- Automated redundant tasks by developing scripts leveraging third-party APIs, boosting efficiency by more than 75%.
- Maintained and enhanced an in-house Java Spring Boot application responsible for certificate revocation.
- Effectively resolved production support tickets, ensuring prompt solutions and seamless project progress.
- Managed critical software and firmware updates for a large inventory (hundreds) of medical devices—including Clinician Programmers (Microsoft Surface Pro), LATITUDE 3300 CRMs (Cardiac Rhythm Management), and IPGs (Implantable Pulse Generator)—ensuring optimal and reliable field performance while maintaining system integrity and proactively mitigating potential device malfunctions.

Software Engineer @ Comcast

August 2021 – September 2022 | Edina, MN

- AWS Certified.
- Collaborated with cross-functional teams to perform large-scale data migration to ensure internal privacy compliance.
- Effectively worked with global team members in different time zones, participated in daily scrums, and met deadlines effectively.
- Improved scalability by converting SQL Stored Procedures into PySpark code.
- Leveraged Python and MinIO for efficient data processing and storage during migration, streamlining data processing workflows by at least 60%.

EDUCATION & AWARDS

University of Minnesota

2021 | Duluth, MN

Computer Science B.S.

Psychology Minor

SCSE Dean's List

PROJECTS

[The Monitor™](#)

Developed a versatile Discord bot in Java, using Gradle for dependency management. This bot supports various commands, offers smooth music/video playback on multiple servers, and utilizes PostgreSQL for data management. Hosted on Railway for seamless deployment.

[Meme API](#)

Powered by Next.js API routes, this RESTful service seamlessly retrieves memes from Giphy, Imgur, and Reddit. Deployed on Vercel Serverless Functions.

[Personal Portfolio](#)

A full-stack, performant progressive web app built using the Next.js JavaScript framework. Designed with UI and UX in mind. Utilizes MongoDB for data retrieval. Deployed on Vercel.

ADDITIONAL EXPERIENCE

Mathematics Instructor @ Mathnasium - The Math Learning Center

December 2019 – August 2021 | Edina, MN

- Collaborated with a team of instructors to tutor approximately 20 students per hour.
- Assisted elementary and middle school students in various math topics, ranging from Elementary Math to Advanced Algebra.
- Provided feedback and support to students, helping them develop their mathematical skills.
- Managed multiple students concurrently, ensuring each student received equal attention and support.
